Limited time only! Jurisdictional Dispute Resolution Course and Workshop offered at no cost for participating CLR Contractors and BCBT affiliates

Keep your projects functioning smoothly by creating a positive environment where union members work together effectively and efficiently while respecting the jurisdiction of each of the affiliate trades.

Learn how to prevent disputes from arising and how to respectfully and quickly address disagreements if they do arise.

Level 1: Online Self-directed Course

The Level 1 course serves as an introduction to jurisdictional issues as well as providing strategies for effective communication during a dispute.

This course is intended for individuals in any level of union or management positions who would benefit from having knowledge of these topics. A certificate is issued on completion.

Level 2: In-person Workshop

The Level 2 workshop is an intermediate course which provides an overview of jurisdictional procedures and resources, as well as giving participants an opportunity to work through case studies and learn a best practices approach to jurisdictional dispute resolution.

This course is intended for senior union and management officials.

These offerings are made possible thanks to a partnership between the Construction Industry's **Jurisdictional Assignment Plan** and **SkillPlan**, our training partner.

Enrollment is easy. Sign up your employees before September 30, 2022 for course completion before December 31, 2022 and the per user Level 1 fee will be waived. Email japlancourse@skillplan.ca with your anticipated training requirements: participant numbers and preferred training dates.

To schedule a Level 2 workshop, email japlan@telus.net for more info and availability of trainers. For a limited time, and subject to trainer availability, this pilot course offering will also be made available at no charge.
